Morgan Security

Long base

Our Morgan trolleys with long base become now Security thanks to the very convenient plastic drawers in 22 and 40 ltrs. with locking key system. They can be assembled to the fitting vertical Rilsan-coated frames which feature up to 4 slots. Here you can put drawers or simple baskets for a better space organization.

The drawers are:

- ERGONOMIC:** they help the end-user with pulling out the necessary material without bending
- SAFE:** they feature a double closing system with one single removable key, and a double slide-out limiter preventing the drawer from falling down..
- STRONG:** totally made of polypropylene holding up to 150 kg.
- CAPACIOUS:** drawers are available in 22 and 40 ltrs.
- HYGIENIC:** easy to clean thanks to their smooth surface without any rift underneath the edges
- PRACTICAL:** the two slots where the drawers slide in can be easily assembled to the vertical frames and can be easily removed for a better cleaning of the trolley.

Handy grip to ease up the use of the drawer

Wide pull-out space of the drawers

Drawers feature a slide-out limiter

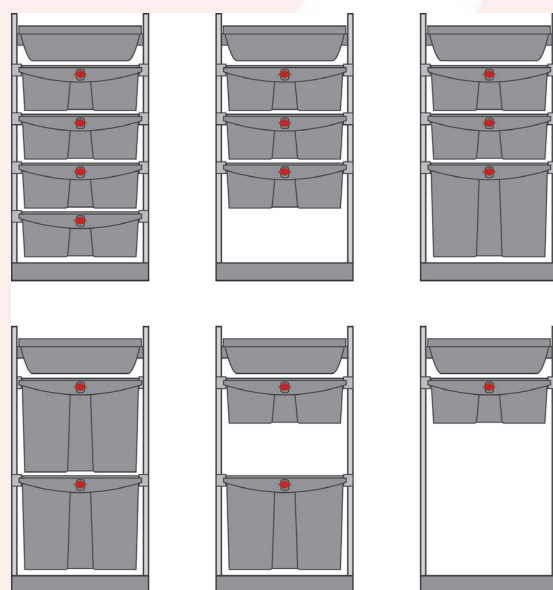

The closing system works through 2 side latches (picture 1 and 2) which slide into the fitting cavities (picture 3) at the end of the slots, thus providing a much safer closure

How to close and remove the key

Some drawer combinations

Some other solutions

Our Security system can be applied to our Morgan trolleys with LONG BASE for any washing, disinfecting and waste collection systems.
